ASH GROVE CEMENT WEST, INC.

Inter-Office Memorandum

Date February 23, 1987

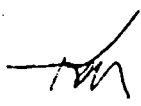

To Jim Post

From Ken Rone

Copies to Erik Voldbaek

Subject Activity Report
Week Ending 2/22/87

- ✓ 1. Changed time and quantities of Superior Quarry permit applications to 12 years and 100,000 tons/year to better suit WEYCO's lease agreement. Issued purchase order to mining engineer to prepare maps, mining plan and reclamation plan.
- ✓ 2. Meeting was called with City of Seattle Traffic Engineers to discuss problem created by changes to intersection in front of our gate. We received no notice of this change and will probably receive no satisfaction. The new configuration creates traffic hazards where there were none before.
- ✓ 3. Switched Stoneway Concrete to Type I-G. Thirty (30) hours later, Stoneway complained there was no paste to the concrete. Mr. Dash investigated and switched them to Type I-D made with Durkee clinker. There have been no complaints since. We will not be able to supply Type I-D to Lakeside and Stoneway after approximately May 15, 1987.
4. Chiyoda International has inquired about the availability of ground gypsum to help get their use of ground blast furnace slagg off the ground. (See Mr. Gould)
5. Removed asbestos insulation from finish mill systems to facilitate winter overhaul work on mill ventilation system.
6. No accidents, no visitors.
